Email: sales@ampwire.co.uk

Wire Mesh Guards made from 1" (25mm) aperture square mesh coated in a standard white finish.

Our guards are manufactured as a safety item and are designed to ensure a clearance of 3" (80mm) between the heater and guard; conforming to BSEN 60529 Standards.

Our guards are produced with key hole lugs to allow for easy fixing whilst allowing the guards to be easily lifted/removed when access to the controls is required (by maintenance), once the fixings are tightened the guards are fixed in a permanent position.

Options:

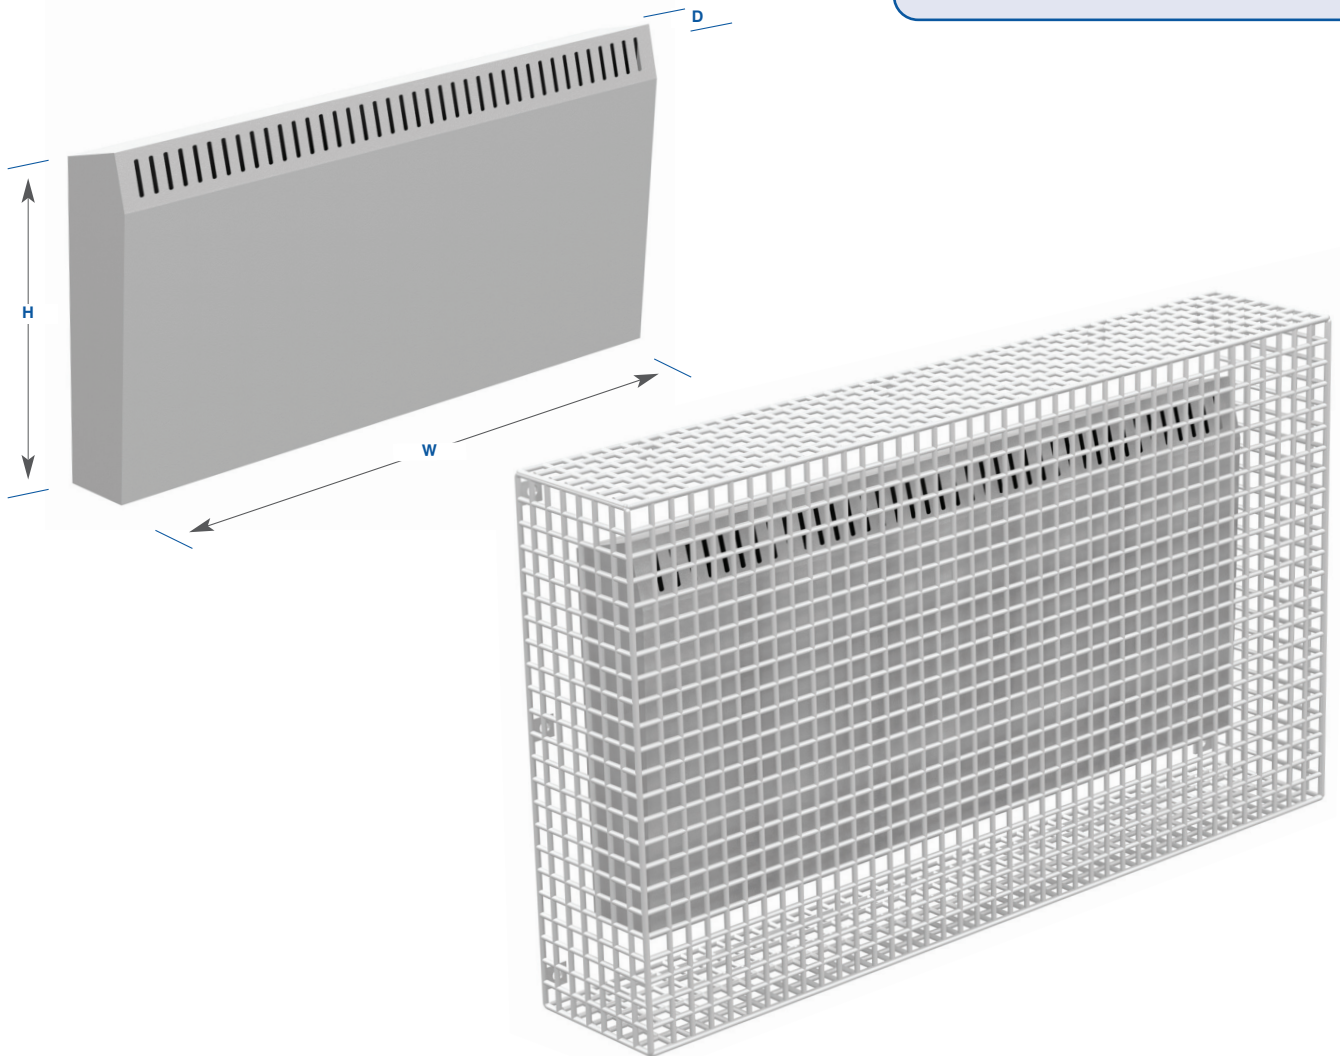

Access to the controls:

If access to the controls is required on a permanent basis we can make a cut out in the mesh, or if you require a hinged flap we can fit one for a small additional cost.

Skirting Allowance:

A free of charge cut out can be made to allow for skirting boards.

Please contact our sales team to discuss these options.

1) Please measure your heater or provide the make & model.

W Width from one edge of the heater to the other.

H Height from the bottom of the heater to the top.

D Depth from wall to the front of the heater.

2) Please indicate location of controls:

Features:

- Rigid Design.
- Prevention of prolonged contact with heater/radiator.
- Minimum reduction of heat output.
- Coated in white plastic for easy maintenance.
